

## Reassure health plans that you're a trusted partner

The CAQH Endpoint Directory, a centralized directory that securely publishes validated FHIR endpoints, simplifies how you find and share information. This national source of truth automates manual processes and enables compliance with federal regulations.

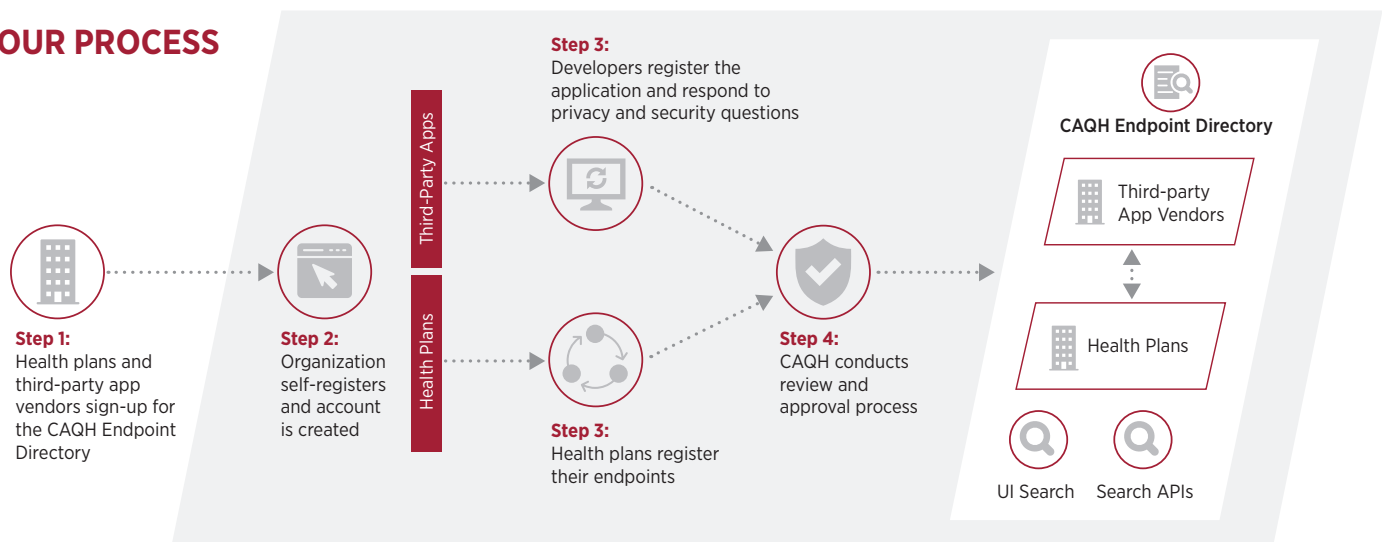

### BENEFITS

- Easily find health plans to connect to in one place
- Save time establishing and maintaining connections with health plans
- Have confidence in technical integrations with health plans

### HOW IT WORKS

- Verifies the identity of payer and third-party app participants
- Confirms privacy and security attestations, privacy policies and data use agreements
- Offers testing and validation to allow you to work with health plans endpoints and conform with FHIR standards
- Facilitates connection requests between parties
