**Methodology:** Transaction volume and per transaction savings results from the [2017 CAQH Index](#) were applied to the number of Medicaid lives per state not covered by a CORE-certified health plan or state fee-for-service program to estimate the annual state savings that could be realized through full CORE Phase I through IV Certification. Annual state savings potential was estimated using state Medicaid enrollment from the “May 2018 Medicaid & CHIP Enrollment Data Highlights” at Medicaid.gov and Medicaid health plan enrollment from “AIS’s Directory of Health Plans, July 2018” at AISHealth.com.
