Phase V CAQH CORE Certification Test Suite v5.0.0**

1 INTRODUCTION

This Phase V CAQH CORE Certification Test Suite contains the requirements that must be met by an entity seeking CORE Certification on the Phase V CAQH CORE Operating Rule Set to be awarded a CORE® Certification Seal. As such, this Test Suite includes:

- Guidance as to the types of stakeholders to which the Phase V CAQH CORE Operating Rule Set apply and how to determine when a specific rule's detailed test script applies to a stakeholder.

- For each Phase V CAQH CORE Prior Authorization Operating Rule:
 - High level summary of key rule requirements
 - The specific conformance testing requirements
 - Test script assumptions
 - Detailed step-by-step test scripts

1.1 CORE CERTIFICATION GUIDING PRINCIPLES

The CAQH CORE Guiding Principles apply to the entire rule set, including the Phase V CAQH CORE Certification Test Suite. CAQH CORE Certification Testing is not exhaustive and does not use production-level testing. The Phase V CAQH CORE Certification Test Suite does not include comprehensive testing requirements to test for all possible permutations of each rule's requirements.

Entities seeking CORE Certification are required to adopt all rules of a phase that apply to their business and are responsible for all their own company-related testing resources, e.g., certain entities only support the prior authorization request and/or response transactions and would only adopt rules pertaining to those transactions. CORE Certification is available for both Real Time and Batch Processing Modes

CAQH CORE Certification Testing is required of any entity seeking CORE Certification. Health Plans and Providers seeking certification for the Phase V CAQH CORE Operating Rule Set must first be CORE-certified for Phases I, II, III and IV of the CAQH CORE Operating Rules. Clearinghouses and Vendors seeking to certify their products or services for the Phase V CAQH CORE Operating Rules must first be CORE-certified for Phases I, II, III and IV of the CAQH CORE Operating Rules to the extent that these products or services involve prior authorization. An entity undergoing CAQH CORE Certification Testing may also choose to undergo combined CAQH CORE Certification Testing for all five phases concurrently.

CAQH Committee on Operating Rules for Information Exchange (CORE) Phase V CAQH CORE Certification Test Suite v5.0.0

The CORE Certification process has four components:¹

1. Pre-certification planning and systems evaluation
2. Signing and submitting the CAQH CORE Pledge
3. CAQH CORE Certification Testing
4. Applying for the CORE Certification Seal

After signing the CAQH CORE Pledge, an entity has 180 days to complete CAQH CORE Certification Testing and submit its application for CORE Certification. The CORE testing protocol is scoped only to demonstrate conformance with CAQH CORE Operating Rules, and not overall compliance with HIPAA; each entity applying for CORE Certification signs a statement affirming that it is HIPAA-compliant to the best of its knowledge (signature is from executive-level management.). CAQH CORE Certification Testing is not exhaustive; e.g., it does not include production data, volume capacity testing, all specific requirements of each rule, or end-to-end trading partner testing. CAQH CORE does not oversee trading partner relationships; CORE-certified entities may work with non-CORE-certified entities if they so desire. The CAQH CORE Certification Testing Policy is used to gain CORE Certification only; it does not outline trading partner implementation interoperability testing activities.

1.2 ELIGIBILITY FOR CORE CERTIFICATION

CAQH CORE certifies all entities that create, transmit or use applicable administrative transactions. CAQH CORE also certifies products or services that facilitate the creation, transmission or use of applicable administrative transactions. CAQH CORE Certification Testing varies based on stakeholder type; entities successfully achieving CORE Certification receive the CORE Certification Seal that corresponds with their stakeholder type.

Associations, medical societies and the like are not eligible to become CORE-certified; instead, these entities receive a CORE “Endorser” Seal after signing the CAQH CORE Pledge. Endorsers are expected to participate in CAQH CORE public relations campaigns, provide feedback and input to CAQH CORE when requested to do so, and encourage their members to consider participating in CAQH CORE.

1.3 ROLE OF CAQH CORE-AUTHORIZED TESTING VENDORS

To obtain a stakeholder-specific CORE Certification Seal, entities must successfully complete stakeholder-specific detailed step-by-step test scripts in the Phase V CAQH CORE Certification Test Suite. Successful completion is demonstrated through proper documentation from a CAQH CORE-authorized Testing Vendor.

CAQH CORE-authorized Testing Vendors are companies that have expertise in healthcare transaction testing. They are chosen by CAQH CORE to conduct CAQH CORE Certification Testing for all phases of the CAQH CORE Operating Rules using the CORE-approved Test Suite specific to each CAQH CORE phase after undergoing a rigorous selection process by CAQH CORE. Alpha and beta testing of their CORE Certification Testing Platform is performed by CAQH CORE Participating Organizations to ensure it aligns with the CAQH CORE Test Suites.

¹ [CORE | CORE Certification Process | CAQH](#)

**CAQH Committee on Operating Rules for Information Exchange (CORE)
Phase V CAQH CORE Certification Test Suite v5.0.0**

NOTE: CORE Certification and CAQH CORE Certification Testing are separate activities. CAQH CORE Certification Testing is performed by entities seeking CORE Certification and supported by CAQH CORE-authorized Testing Vendors. CORE Certification is awarded by CAQH CORE after a review of the completed certification testing with a CAQH CORE-authorized Testing Vendor.

1.4 APPLICABILITY OF THIS DOCUMENT

All entities seeking CORE Certification must successfully complete Phase V CAQH CORE Certification Testing from a CAQH CORE-authorized Testing Vendor in accordance with the Phase V CAQH CORE Certification Test Suite. This is required to maintain standard and consistent test results and Phase V CAQH CORE Operating Rule conformance. There are no exceptions to this requirement.

While the Phase V CAQH CORE Operating Rule Set applies specifically to HIPAA-covered health plans, HIPAA-covered providers, or their respective agents² (see §2.2.5), CORE Certification Seals are awarded to a broader range of entities including non HIPAA-covered entities. In general, all entities that create, transmit or use applicable administrative transactions may seek CORE Certification. CAQH CORE also certifies products or services that facilitate the creation, transmission or use of applicable administrative transactions.

Entities that can obtain CORE Certification Seals are categorized into four CORE Certification stakeholder types: Providers, Health Plans, Clearinghouses, and Vendors. While three of the four CORE Certification stakeholder types share names with HIPAA-covered entities – Health Plans, Providers, and Clearinghouses – for purposes of CORE Certification, these three CORE Certification stakeholder types encompass a broader group of entities than what is included in their respective HIPAA definitions. For instance, the CORE Certification stakeholder type “Health Plan” also includes third party administrators (TPAs) which generally are not defined as HIPAA-covered entities. Other examples of entities that fall into these CORE Certification stakeholder types are described in Section 2.2.5. Throughout the remainder of this document, unless otherwise specified, references to Provider, Health Plan, Clearinghouse, and Vendor are references to the CORE Certification stakeholder type categorizations.

2 GUIDANCE FOR USING THIS CERTIFICATION TEST SUITE

2.1 STRUCTURE OF TEST SCENARIOS FOR THE PHASE V RULE SET

Each Test Scenario for each rule contains the following sections:

- Key Rule Requirements
 - The Phase V CAQH CORE Operating Rule Set contain the actual rule language and are the final authority for all operating rule requirements
- Certification conformance testing requirements by rule
- Test assumptions by rule
- Detailed Step-by-Step Test Scripts addressing each conformance testing requirement by rule for each stakeholder type to which the test script applies

**CAQH Committee on Operating Rules for Information Exchange (CORE)
Phase V CAQH CORE Certification Test Suite v5.0.0**

2.2 DETERMINING CAQH CORE STAKEHOLDER TYPE FOR CORE CERTIFICATION

Each test script listed in the Detailed Step-by-Step Test Script section for each Test Scenario is applicable to one or more of the CORE Certification stakeholder types specified in the Stakeholder columns. An entity may indicate that a specific test script does not apply to it. In this case the entity is required to provide a rationale for why a specific test script is not applicable and be prepared for a review of the rationale with CAQH CORE Staff.

The CORE Certification stakeholder types to which the Detailed Step-by-Step Test Scripts apply are Provider, Health Plan, Clearinghouse, and Vendor.

2.2.1 CORE Certification Provider Stakeholder Type

The CORE Certification stakeholder type “Provider” includes, but is not limited to, a HIPAA-covered provider. The CORE Certification stakeholder type Provider may also include any entity (i.e., an agent) that offers administrative services for a provider or group of providers and may include other agents that take the role of provider in HIPAA-mandated standard transactions. Notwithstanding, HIPAA-covered providers such as physicians, hospitals, dentists, and other providers of medical or health services are included in the CORE Certification Provider stakeholder type. (See §2.2.5 for more detail.)

2.2.2 CORE Certification Health Plan Stakeholder Type

As noted above, the CORE Certification stakeholder type “Health Plan” includes, but is not limited to, HIPAA-covered health plans. The CORE Certification stakeholder type Health Plan, is more akin to entities that the industry refers to as “payers,” and includes third party administrators (TPAs), contractors with administrative services only (ASO) arrangements, utilization management organizations (UMO), and other agents that may conduct some or all elements of the HIPAA transactions on the behalf of a HIPAA-covered health plan. Notwithstanding, HIPAA-covered health plans such as self-insured health plans, health plan issuers, government health plans, and others are included in the CORE Certification Health Plan stakeholder type. (See §2.2.5 for more detail.)

2.2.3 CORE Certification Clearinghouse Stakeholder Type

The CORE Certification stakeholder type “Clearinghouse” includes, but is not limited to, HIPAA-covered health care clearinghouses. HIPAA defines a health care clearinghouse as an entity that processes health information received in a non-standard format into a standard format, or vice versa³. For purposes of CORE Certification, any intermediary between a Provider and a Health Plan CORE Certification stakeholder type that performs some or all aspects of a HIPAA-mandated function or a Phase V CAQH CORE Operating Rule could be considered a CORE Certification Clearinghouse stakeholder type. (See §2.2.5 for more detail.)

2.2.4 CORE Certification Vendor Stakeholder Type

An entity (hereafter vendor) may offer commercially-available software products or services that enables a provider, a health plan or a clearinghouse to carry out HIPAA-required functions (e.g., standard transactions or a Phase V CAQH CORE Operating Rule). Such vendor’s products or services also are eligible for CORE Certification. In the context of this Phase V CAQH CORE Certification Test Suite, a vendor with commercially-available products can

³ See 45 CFR 160.103

**CAQH Committee on Operating Rules for Information Exchange (CORE)
Phase V CAQH CORE Certification Test Suite v5.0.0**

seek CORE Certification for those products/services and must certify each of its specific products/services and product/service versions separately. (See §2.2.5 for more detail.)

2.2.5 *Table of CORE Certification Stakeholder Types Examples*

This table includes examples of entities that can obtain CORE Certification Seals. This table is not intended to be comprehensive and exhaustive and may not include all possible entities.

**CAQH Committee on Operating Rules for Information Exchange (CORE)

**CAQH Committee on Operating Rules for Information Exchange (CORE)
Phase V CAQH CORE Certification Test Suite v5.0.0**

2.3 USER QUICK START GUIDE

An entity can access a User Quick Start Guide specific to the phase of CAQH CORE Operating Rules for which it is seeking CORE Certification when it initially establishes its testing profile on the CAQH CORE-authorized Testing Vendor's test site. The User Quick Start Guide is to be used in connection with a CAQH CORE-authorized Testing Vendor's certification testing system. It is meant to serve as an instruction document for the design and general utility of the testing system and is not a step-by-step CORE Certification guide.

2.4 GUIDANCE FOR PROVIDERS AND HEALTH PLANS SEEKING PHASE V CAQH CORE CERTIFICATION THAT WORK WITH AGENTS

Any Provider or Health Plan seeking CORE Certification must undergo certification testing in accordance with the Phase V CAQH CORE Certification Test Suite. However, a Provider or a Health Plan may also be CORE-certified when it outsources various functions to a third party, i.e., a business associate (referenced as an agent in the Phase V CAQH CORE Operating Rules). Thus, the Detailed Step-by-Step Test Scripts recognize that a Provider or a Health Plan may use a business associate to perform some or all the HIPAA-mandated functions required by the HIPAA-mandated standards and/or the Phase V CAQH CORE Operating Rule Set on its behalf.

When a Provider or a Health Plan outsources some functions to a business associate, both the Provider or Health Plan and its respective business associate to which the functions are outsourced must undergo CAQH CORE Certification Testing. The CORE rule requirements for either a Provider or a Health Plan differ by situation and such variability is dependent on how the Provider or the Health Plan interacts with its business associate and what services (i.e., functions and capabilities) its business associate provides to it. For example, a Health Plan seeking Phase V CORE Certification that uses a Clearinghouse may have some unique circumstances when undergoing certification testing. Because there is a Clearinghouse between the Health Plan's system and the Provider's system, the Clearinghouse acts as a "proxy" for some of the CORE Certification requirements outlined in the Phase V CAQH CORE Certification Test Suite.

Keep in mind that certification testing differs by each test scenario and each detailed step-by-step test script. Dependent upon the agreement between the Provider or the Health Plan and the Clearinghouse, the Provider or the Health Plan may not have to undergo certification testing for some aspects of the rules and their associated test scripts. In such a case, the Provider or the Health Plan must provide a rationale statement which explains the situation to the CAQH CORE-authorized Testing Vendor for each test script for which the N/A option is chosen and the Provider or the Health Plan needs to be prepared for a review of the rationale with CAQH CORE Staff.

2.5 PHASE V MASTER TEST BED DATA

The Phase V CAQH CORE Certification Test Suite requires that all organizations seeking Phase V CORE Certification be tested using the same Phase V CORE Master Test Bed Data. While the Phase V Master Test Bed Data builds and elaborates on the [Phase II CORE Certification Testing Master Test Bed Data](#), the scope of the Phase V Master Test Bed Data is limited to data needed for entities seeking to become Phase V CORE-certified to create and populate their internal files and/or databases addressing prior authorization only. These data are then used for internal pre-certification testing and formal Phase V CORE Certification Testing for the Phase V CORE rule requirements:

- Phase V CAQH CORE Prior Authorization (278) Request/Response Data Content Rule
- Phase V CAQH CORE Prior Authorization Web Portal Rule

**CAQH Committee on Operating Rules for Information Exchange (CORE)
Phase V CAQH CORE Certification Test Suite v5.0.0**

The Phase V CORE Master Test Bed Data is available for free to any entity in Excel spreadsheet format so that organizations may easily extract the key data elements and load them into their internal test databases. CORE Master Test Bed Data does not include all data that an entity may require to load into their internal systems; therefore, entities may need to add other data to the CORE Master Test Bed Data when loading internal systems.

Thus, the CAQH CORE-authorized testing vendor uses only the Phase V CORE Master Test Bed Data to conduct Phase V CORE Certification testing for the Phase V CAQH CORE Prior Authorization (278) Request/Response Data Content and Phase V CAQH CORE Prior Authorization Web Portal rules. However, the 5010X217 278 Transactions created using the Phase V CORE Master Test Bed Data must conform to the X12/005010X217 Health Care Services Review – Request for Review and Response (278) Technical Report Type 3.⁵

¹⁸ The X12/005010X217 Health Care Services Review – Request for Review and Response (278) Technical Report Type 3 is available at <http://store.x12.org/store/>

**CAQH Committee on Operating Rules for Information Exchange (CORE)
Phase V CAQH CORE Certification Test Suite v5.0.0**

3 PHASE V CAQH CORE PRIOR AUTHORIZATION (278) REQUEST / RESPONSE DATA CONTENT RULE TEST SCENARIO

3.1 PHASE V CAQH CORE PRIOR AUTHORIZATION (278) REQUEST/RESPONSE DATA CONTENT RULE KEY REQUIREMENTS

Note: This section identifies at a high level the key requirements of this rule. Refer to the Phase V CAQH CORE Operating Rule Set for the specific language of the rule which governs. Section numbers in parentheses following each key requirement refer to the specific rule section which applies.

Provider Submission Requirements (§4.1)

- When the patient is the subscriber, the provider must submit the Patient Last Name, First Name and Date-of-Birth in Loop ID 2010C Subscriber Name NM1 and DMG segments.
- When the patient is the dependent, the provider must submit Subscriber Last Name, First Name and Date-of-Birth in Loop ID 2010C Subscriber Name NM1 and DMG segments and Dependent Last Name, First Name and Date-of-Birth in Loop ID 2010D Dependent Name NM1 and DMG segments.

Normalizing Last Name Requirements (§4.2.1, §4.2.1.1, §4.2.1.2)

- Requires a Phase V CORE-Certified health plan (or information source) to normalize the last name submitted on the 5010X217 278 and internally-stored last name prior to using submitted last name for matching or verification.

Consistent and Uniform Use of AAA Error and Action Codes Requirements (§4.2.2)

- When the health plan detects an error in data submitted in the following loops
 - Loop ID 2000A Request
 - Loop ID 2010A Utilization Management Organization (UMO) Name
 - Loop ID 2010B Requester Request
 - Loop ID 2010C Subscriber Request
 - Loop ID 2010D Dependent Request
 - Loop ID 2000E Patient Event Request
 - Loop ID 2010EA Patient Event Provider Request
 - Loop ID 2010EC Patient Event Transport Location Request
 - Loop ID 2000F Service Request
 - Loop ID 2010FA Service Provider Request

the most specific AAA Error Code AAA03 901 Reject Reason Code permitted in the respective loops AAA Segment code set must be returned.

Out-of-network Requester, Service Provider or Specialty Entity (§4.2.2.1)

**CAQH Committee on Operating Rules for Information Exchange (CORE)
Phase V CAQH CORE Certification Test Suite v5.0.0**

3.1 PHASE V CAQH CORE PRIOR AUTHORIZATION (278) REQUEST/RESPONSE DATA CONTENT RULE KEY REQUIREMENTS

- When the requester provider, service provider or specialty entity submitted on the 5010X217 278 Request is determined to be out-of-network in the following loops
 - LOOP ID - 2010B AAA - Requester Request
 - LOOP ID - 2010EA AAA Patient Event Provider Request
 - LOOP ID - 2010FA AAA - Service Provider Request
- Error Code 35-Out of Network must be returned in AAA03 901 Reject Reason Code Data Element in addition to any other AAA03 901 Reject Reason Code

Requesting Additional Documentation for a Pended Response (§4.2.3.1)

- When the 5010X217 278 Request includes one or more Diagnosis Code(s) in Loop 2000E Patient Event Level HI Patient Diagnosis Health Care Information Codes that can be categorized by the health plan and its agent into one or more of the following types of events:
 - General Outpatient
 - Inpatient
 - Surgery
 - Oncology
 - Cardiology
 - Imaging
 - Laboratory
 - Physical Therapy
 - Occupational Therapy
 - Speech-Language Pathology

And

Additional medical information is required, the health plan and its agent must return data element HCR01 306 Action Code=A4 Pended and HCR03 Industry Code 0V-Requires Medical Review or HCR03 Industry Code 0P-Requested Information Not Received or HCR03 Industry Code 0U-Additional Patient Information Required in Loop ID 2000E HCR Health Care Services Review Segment to indicate that the review outcome is pended for additional medical information and either

- The appropriate PWK01 Attachment Report Type Code in Loop ID 2000E PWK – Additional Patient Information Segment.

Or

**CAQH Committee on Operating Rules for Information Exchange (CORE)
Phase V CAQH CORE Certification Test Suite v5.0.0**

3.1 PHASE V CAQH CORE PRIOR AUTHORIZATION (278) REQUEST/RESPONSE DATA CONTENT RULE KEY REQUIREMENTS

- One or more appropriate Logical Observation Identifier Names and Codes (LOINC) Code from the HL7 CDA® R2 Attachment Implementation Guide: Exchange of C-CDA Based Documents, Release 1 (Universal Realm) Standard for Trial Use August 2017¹⁹ in Loop ID 2000E HI – Patient Diagnosis Health Care Information Codes Segment.

And

- The appropriate PWK01 Attachment Report Type Code in Loop ID 2000E PWK – Additional Patient Information Segment.

Requesting Additional Documentation for a Pended Response (§4.2.3.2)

- When the 5010X217 278 Request transaction includes one or more Procedure or Revenue Code(s) in Loop 2000F Service Level SV1, SV2, or SV3 segments²⁰ that can be placed by the health plan and its agent into one or more of the following types of service:
 - General Outpatient
 - Inpatient
 - Surgery
 - Oncology
 - Cardiology
 - Imaging
 - Laboratory
 - Physical Therapy
 - Occupational Therapy
 - Speech-Language Pathology

and

Additional medical information is required, the health plan and its agent must return data element HCR01 306 Action Code=A4 Pended
Additional medical information is required, the health plan and its agent must return data element HCR01 306 Action Code=A4 Pended and HCR03 Industry Code 0V-Requires Medical Review or HCR03 Industry Code 0P-Requested Information Not Received or HCR03 Industry Code 0U-Additional Patient Information Required in Loop ID 2000F HCR Health Care Services Review Segment to indicate that the review outcome is pended for additional medical information and either

- The appropriate PWK01 Attachment Report Type Code in Loop ID 2000F PWK – Additional Patient Information Segment.

Or

¹⁹ See Appendix – Section 5.3 for further description of Logical Observation Identifier Names and Codes.

²⁰ The 5010X217 278 Request requires the submission of a procedure or revenue code when known by the provider (requester) in Loop 2000F SV1, SV2, or SV3 Service Level Segments. When the provider needs to submit more than one procedure or revenue code Loop 2000F must be repeated for each additional code.

**CAQH Committee on Operating Rules for Information Exchange (CORE)
Phase V CAQH CORE Certification Test Suite v5.0.0**

3.1 PHASE V CAQH CORE PRIOR AUTHORIZATION (278) REQUEST/RESPONSE DATA CONTENT RULE KEY REQUIREMENTS

- One or more appropriate Logical Observation Identifier Names and Codes (LOINC) Code from the HL7 CDA® R2 Attachment Implementation Guide: Exchange of C-CDA Based Documents, Release 1 (Universal Realm) Standard for Trial Use August 2017 in Loop ID 2000F HI – Request for Additional Information Health Care Information Codes Segment.

And

- The appropriate PWK01 Attachment Report Type Code in Loop ID 2000F PWK – Additional Patient Information Segment.

Using Health Care Service Decision Reason Codes (HCSDRC) (§4.2.4)

- When the health plan and its agent use the Health Care Service Decision Reason Code (HCSDRC) in Loop ID 2000E Patient Event Detail HCR Segment, if appropriate, one or more additional Health Care Service Decision Reason Codes (HCSDRC) should be returned in the HCR Segment in addition to the required code to provide the most comprehensive information to the submitter.
- When the health plan and its agent use the Health Care Service Decision Reason Code (HCSDRC) in Loop ID 2000F Service Level Detail HCR Segment, if appropriate, one or more Health Care Service Decision Reason Codes (HCSDRC) should be returned in the HCR Segment in addition to the required code to provide the most comprehensive information back to the provider.

Detection and Display of 278 Response Data Elements (§4.3)

- The receiver of a 5010X217 278 Response is required to detect and extract all data elements, data element codes and corresponding code definitions to which this rule applies as returned by the health plan and its agent in the 278 Response must display or otherwise make the data appropriately available to the end user without altering the semantic meaning of the 5010X217 278 Response data content.

3.2 PHASE V CAQH CORE PRIOR AUTHORIZATION (278) REQUEST / RESPONSE DATA CONTENT RULE CONFORMANCE TESTING REQUIREMENTS

These scenarios test the following conformance requirements of the Phase V CAQH CORE Prior Authorization (278) Request/Response Data Content Rule. Other requirements of this rule that may not be listed below are not included in this test scenario. Notwithstanding, CORE-certified entities are required to comply with all specifications of the rule not included in this test scenario. Note: Clearinghouses and/or Vendors undergoing CAQH CORE Certification Testing should refer to Detailed Step-by-Step Test Scripts for applicable test scripts.

Provider Submission

The provider must submit the Patient Last Name, First Name and Date-of-Birth in Loop ID 2010C Subscriber Name NM1 and DMG segments.

**CAQH Committee on Operating Rules for Information Exchange (CORE)
Phase V CAQH CORE Certification Test Suite v5.0.0**

3.2 PHASE V CAQH CORE PRIOR AUTHORIZATION (278) REQUEST / RESPONSE DATA CONTENT RULE CONFORMANCE TESTING REQUIREMENTS

The provider must submit Subscriber Last Name, First Name and Date-of-Birth in Loop ID 2010C Subscriber Name NM1 and DMG segments and Dependent Last Name, First Name and Date-of-Birth in Loop ID 2010D Dependent Name NM1 and DMG segments.

Uniform Use of AAA Error and Action Codes Requirements

The most specific AAA Error Code AAA03 901 Reject Reason Code permitted in the respective loops AAA Segment code set must be returned for errors detected in data submitted in the following loops

- Loop ID 2010B Requester Request
- Loop ID 2010C Subscriber Request
- Loop ID 2010D Dependent Request
- Loop ID 2000E Patient Event Request
- Loop ID 2000F Service Request

Requesting Additional Documentation for a Pended Patient Event Response

- To indicate that the review outcome is pended for additional medical information for a Laboratory Diagnosis Code submitted in the 5010X217 Request Loop 2000E Patient Event Level HI Patient Diagnosis Health Care Information Code the 5010X217 278 Response must include
 - HCR01 306 Action Code=A4 Pended and HCR03 Industry Code 0V-Requires Medical Review in Loop ID 2000E HCR Health Care Services Review Segmentand
 - the appropriate PWK01 Attachment Report Type Code in Loop ID 2000E PWK – Additional Patient Information Segment.
- To indicate that the review outcome is pended for additional medical information for an Imaging Diagnosis Code submitted in the 5010X217 Request Loop 2000E Patient Event Level HI Patient Diagnosis Health Care Information Code the 5010X217 278 Response must include
 - HCR01 306 Action Code=A4 Pended and HCR03 Industry Code 0V-Requires Medical Review in Loop ID 2000E HCR Health Care Services Review Segmentand
 - the appropriate PWK01 Attachment Report Type Code in Loop ID 2000E PWK – Additional Patient Information Segment.
- To indicate that the review outcome is pended for additional medical information for a Cardiology Diagnosis Code submitted in the 5010X217 278 Request Loop 2000E Patient Event Level HI Patient Diagnosis Health Care Information Code the 5010X217 278 Response must include

**CAQH Committee on Operating Rules for Information Exchange (CORE)
Phase V CAQH CORE Certification Test Suite v5.0.0**

3.2 PHASE V CAQH CORE PRIOR AUTHORIZATION (278) REQUEST / RESPONSE DATA CONTENT RULE CONFORMANCE TESTING REQUIREMENTS

- HCR01 306 Action Code=A4 Pended and HCR03 Industry Code 0V-Requires Medical Review in Loop ID 2000E HCR Health Care Services Review Segment

and

- one appropriate Logical Observation Identifier Names and Codes (LOINC) Code in data element 2017 in Loop ID 2000E HI – Patient Diagnosis Health Care Information Codes Segment

and

- the appropriate PWK01 Attachment Report Type Code in Loop ID 2000E PWK – Additional Patient Information Segment.

Requesting Additional Documentation for a Pended Service Level Response

- To indicate that the review outcome is pended for additional medical information for an Imaging Procedure or Revenue Code submitted in Loop 2000F Service Level SV1 segment in the 5010X217 278 Request the 5010X217 278 Response Loop ID 2000F HCR Health Care Services Review Segment must include
 - HCR01 306 Action Code=A4 Pended and HCR03 Industry Code 0V-Requires Medical Review in Loop ID 2000F HCR Health Care Services Review Segment

and

 - the appropriate PWK01 Attachment Report Type Code in Loop ID 2000F PWK – Additional Patient Information Segment.
- To indicate that the review outcome is pended for additional medical information for an Oncology Procedure or Revenue Code submitted in Loop 2000F Service Level SV2 segment in the 5010X217 278 Request the 5010X217 278 Response Loop ID 2000F HCR Health Care Services Review Segment must include
 - HCR01 306 Action Code=A4 Pended and HCR03 Industry Code 0V-Requires Medical Review in Loop ID 2000F HCR Health Care Services Review Segment

and

 - the appropriate PWK01 Attachment Report Type Code in Loop ID 2000F PWK – Additional Patient Information Segment.
- To indicate that the review outcome is pended for additional medical information for a Laboratory Procedure or Revenue Code submitted in Loop 2000F Service Level SV1 segment in the 5010X217 278 Request the 5010X217 278 Response must include
 - HCR01 306 Action Code=A4 Pended and HCR03 Industry Code 0V-Requires Medical Review in Loop ID 2000F HCR Health Care Services Review Segment

**CAQH Committee on Operating Rules for Information Exchange (CORE)
Phase V CAQH CORE Certification Test Suite v5.0.0**

3.2 PHASE V CAQH CORE PRIOR AUTHORIZATION (278) REQUEST / RESPONSE DATA CONTENT RULE CONFORMANCE TESTING REQUIREMENTS

and

- one appropriate Logical Observation Identifier Names and Codes (LOINC) Code in data element 2017 in Loop ID 2000F HI – Request for Additional Information Health Care Information Codes Segment

and

- the appropriate PWK01 Attachment Report Type Code in Loop ID 2000F PWK – Additional Patient Information Segment.
- To indicate that the review outcome is pended for additional medical information for a Cardiology Procedure or Revenue Code submitted in Loop 2000F Service Level SV2 segment in the 5010X217 278 Request the 5010X217 278 Response must include
 - HCR01 306 Action Code=A4 Pended and HCR03 Industry Code 0V-Requires Medical Review in Loop ID 2000E HCR Health Care Services Review Segment

and

- one appropriate Logical Observation Identifier Names and Codes (LOINC) Code in data element 2017 in Loop ID 2000E HI – Patient Diagnosis Health Care Information Codes Segment

and

- the appropriate PWK01 Attachment Report Type Code in Loop ID 2000F PWK – Additional Patient Information Segment.

Detection and Display of 278 Response Data Elements

The receiver of a 5010X217 278 Response must detect, extract and display all data elements, data element codes and corresponding code definitions as returned in the 278 Response.

**CAQH Committee on Operating Rules for Information Exchange (CORE)
Phase V CAQH CORE Certification Test Suite v5.0.0**

3.3 PHASE V CAQH CORE PRIOR AUTHORIZATION (278) REQUEST / RESPONSE DATA CONTENT RULE TEST SCRIPTS ASSUMPTIONS

If applicable, entity is Phase I, II, III and IV CORE-certified.

The CORE test scripts do not include comprehensive testing requirements to test for all possible permutations of the CORE requirements of the rule.

3.4 PHASE V CAQH CORE PRIOR AUTHORIZATION (278) REQUEST / RESPONSE DATA CONTENT RULE DETAILED STEP-BY-STEP TEST SCRIPTS

CAQH CORE Certification Testing is not exhaustive. The CAQH CORE Certification Test Suite does not include comprehensive testing requirements that test for all possible permutations of each rule. An individual test script may be testing for more than one item, and, as noted in the “Stakeholder” column, each test script tests for the role of the stakeholder(s) to which the test script applies.

The Detailed Step-by-Step Test Scripts below specify the stakeholder type to which each test script applies. A stakeholder may indicate that a specific test script does not apply to it. In this case the stakeholder is required to provide a rationale for why a specific test script is not applicable and be prepared for a review of the rationale with CAQH CORE Staff.

When establishing a certification test profile with a CAQH CORE-authorized Testing Vendor, a Vendor is given the option to indicate if the product it is certifying is a Provider-facing product or a Health Plan-facing product. Therefore, the Detailed Step-by-Step Test Scripts applicable to a Provider apply to a Provider-facing product. Similarly, detailed step-by-step test scripts applicable to a Health Plan apply to a Health Plan-facing product.

Test #	Criteria	Expected Result	Actual Result	Pass	Fail	N/A	Stakeholder			
							Provider	Health Plan	Clearinghouse	Vendor
Provider Request Submission & Response Processing										
1.	Create a valid 5010X217 278 request transaction as defined in the CORE rule requesting a prior authorization for an Oncology service in Loop 2000F Service Level for one of the Dependents	Output a valid fully enveloped 5010X217 278 request transaction set with complete Subscriber and Dependent names.		<input type="checkbox"/> Pass	<input type="checkbox"/> Fail	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>

4 PHASE V CAQH CORE PRIOR AUTHORIZATION WEB PORTAL RULE TEST SCENARIO

4.1 PHASE V CAQH CORE PRIOR AUTHORIZATION WEB PORTAL RULE KEY REQUIREMENTS

Note: This section identifies at a high level the key requirements of this rule. Refer to the Phase V CAQH CORE Operating Rule Set for the specific language of the rule which governs. Section numbers in parentheses following each key requirement refer to the specific rule section which applies.

System Availability Requirements (§4.1)

- A HIPAA-covered health plan or its agent's system availability must be no less than 86 percent per calendar week.
- A HIPAA-covered health plan or its agent must publish their regularly scheduled system downtime in an appropriate manner.
- A HIPAA-covered health plan or its agent must publish the schedule of non-routine downtime at least one week in advance.
- A HIPAA-covered health plan or its agent must provide information within one hour of realizing downtime will be needed in the event of unscheduled/emergency downtime.
- No response is required during scheduled or unscheduled/emergency downtime(s).
- A HIPAA-covered health plan or its agent must establish and publish its own holiday schedule.

Web Form Data Request Field Labels (§4.2.1)

- The web portal operator of prior authorization submissions must apply the corresponding loop, segment, data element name from the 5010X217 278 Request and Response to all web form data fields using the
 - IMPLEMENTATION NAME for each corresponding loop, segment and data element where an IMPLEMENTATION NAME exists
 - or
 - Use the ALIAS if it is available and identified as such in the 5010X217 278 when an IMPLEMENTATION NAME does not exist or is considered less common.
- When an IMPLEMENTATION NAME or ALIAS for a corresponding loop, segment and data element does not exist the X12 base standard loop, segment and data element names must be used for the web form data field, when available.

Web Form Data Response Field Labels (§4.2.2)

- The web portal operator receiving a 5010X217 278 Response transaction to a previously submitted prior authorization request must apply the corresponding loop, segment, data element name from the 5010X217 278 Response transaction to all web form data fields using the

**CAQH Committee on Operating Rules for Information Exchange (CORE)
Phase V CAQH CORE Certification Test Suite v5.0.0**

4.1 PHASE V CAQH CORE PRIOR AUTHORIZATION WEB PORTAL RULE KEY REQUIREMENTS

- IMPLEMENTATION NAME for each corresponding loop, segment and data element where an IMPLEMENTATION NAME exists
or
- Use the ALIAS if it is available and identified as such in the 5010X217 278 when an IMPLEMENTATION NAME does not exist.
- When an IMPLEMENTATION NAME or ALIAS for a corresponding loop, segment and data element does not exist the X12 base standard loop, segment and data element names must be used for the web form data field, when available.

Use of the X12/005010X217 Health Care Services Review Request for Review and Response (278) Technical Report 3 (§4.3)

- The data collected from the web form and mapped to the X12/005010X217 Health Care Services Review – Request for Review and Response (278) transaction must comply with the Phase V CAQH CORE Prior Authorization 278 Request/Response Data Content Rule.

Confirmation of Receipt of Web Form Submission (§4.4)

- A submission receipt indicating to the provider that the completed prior authorization request form was successfully received, and the web portal operator's next steps must be returned when the submitter clicks a "submit" or similar button along with information about the web portal operator's "next steps." Examples of such information include:
 - Submitter is notified if the web portal operator requires additional documentation to process the request;
 - Submitter has the option to print and save a PDF;
 - Submitter may view the authorization status;
 - Submitter may check the status, or an update of a previously submitted request, for the prior authorization request via hypertext that includes a navigation bar or a sidebar menu linking to other web pages via hyperlinks, often referred to as links
 - Submitter is provided information about the assignment of a transaction or reference control number;
 - Submitter is provided a detailed timestamp including time zone for the submission.

**CAQH Committee on Operating Rules for Information Exchange (CORE)
Phase V CAQH CORE Certification Test Suite v5.0.0**

4.2 PHASE V CAQH CORE PRIOR AUTHORIZATION WEB PORTAL RULE CONFORMANCE TESTING REQUIREMENTS

These scenarios test the following conformance requirements of the Web Portal rule. Other requirements of this rule that may not be listed below are not included in this test scenario. Notwithstanding, CORE-certified entities are required to comply with all specifications of the rule not included in this test scenario. Note: Clearinghouses and/or Vendors undergoing CORE Certification Testing should refer to Detailed Step-by-Step Test Scripts for applicable test scripts.

System Availability

Demonstrate its ability to publish to its trading partner community the following schedules:

- Its regularly scheduled downtime schedule, including holidays, and
- Its notice of non-routine downtime showing schedule of times down, and
- A notice of unscheduled/emergency downtime notice.

Web Form Data Field Labels

Display the application of the IMPLEMENTATION NAME or ALIAS to the corresponding loop, segment, data element name from the 5010X217 278 Request and Response to all web form submission data fields, when available.

Use of the 005010X217 278 TR3

Demonstrate compliance with the Phase V CAQH CORE Prior Authorization 278 Request/Response Data Content Rule.

Confirmation of Web Form Submission

Demonstrate submission receipt indicating to the provider that the completed prior authorization request form was successfully received.

4.3 PHASE V CAQH CORE PRIOR AUTHORIZATION WEB PORTAL RULE TEST SCRIPTS ASSUMPTIONS

If applicable, entity is Phase I, II, III and IV CORE-certified.

The CORE test scripts do not include comprehensive testing requirements to test for all possible permutations of the CORE requirements of the rule.

**CAQH Committee on Operating Rules for Information Exchange (CORE)
Phase V CAQH CORE Certification Test Suite v5.0.0**

4.4 PHASE V CAQH CORE PRIOR AUTHORIZATION WEB PORTAL RULE DETAILED STEP-BY-STEP TEST SCRIPTS

CAQH CORE Certification Testing is not exhaustive. The CAQH CORE Certification Test Suite does not include comprehensive testing requirements that test for all possible permutations of each rule. An individual test script may be testing for more than one item, and, as noted in the “Stakeholder” column, each test script tests for the role of the stakeholder(s) to which the test script applies.

The Detailed Step-by-Step Test Scripts below specify the stakeholder type to which each test script applies. A stakeholder may indicate that a specific test script does not apply to it. In this case the stakeholder is required to provide a rationale for why a specific test script is not applicable and be prepared for a review of the rationale with CAQH CORE Staff.

When establishing a certification test profile with a CAQH CORE-authorized Testing Vendor, a Vendor is given the option to indicate if the product it is certifying is a Provider-facing product or a Health Plan-facing product. Therefore, the Detailed Step-by-Step Test Scripts applicable to a Provider apply to a Provider-facing product. Similarly, detailed step-by-step test scripts applicable to a Health Plan apply to a Health Plan-facing product.

Test #	Criteria	Expected Result	Actual Result	Pass	Fail	N/A	Stakeholder			
							<i>An X in the box indicates the stakeholder type to which the test applies</i>			
							Provider	Health Plan	Clearinghouse	Vendor
System Availability										
1	Publication of regularly scheduled downtime, including holidays and method(s) for such publication.	Submission of actual published copies of regularly scheduled downtime, including holidays and method(s) of publishing.		<input type="checkbox"/> Pass	<input type="checkbox"/> Fail	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
