

Increasing adoption of Electronic Funds Transfer (EFT) to replace paper checks continues to be challenging for many health plans. Trying to enroll all healthcare providers — especially lower volume practices — can be difficult, leading to a “two-tier” payment system requiring expensive, time-consuming manual payments.

---

CAQH has developed a simple, cost-effective solution to help health plans move closer to universal EFT. EnrollHub<sup>™</sup>, a CAQH Solution<sup>®</sup>, combines enrollment capabilities for EFT and Electronic Remittance Advice (ERA), enabling healthcare providers to use a single, secure on-line process to enroll with multiple health plans at once. EnrollHub then sends their enrollment information directly to each authorized participating health plan.

This easy-to-use enrollment tool — available at no charge to healthcare providers — encourages greater provider participation and satisfaction:

- Providers are able to access EnrollHub online at any time to easily make changes, helping ensure health plans have up-to-date information.
- The EnrollHub team works closely with your health plan to engage your providers with a robust outreach effort to encourage them to enroll.
- More than 1.3 million providers are part of CAQH ProView<sup>™</sup> (the next generation of the Universal

Provider Datasource<sup>®</sup>) to share their credentialing and other practice information. They already know and trust CAQH electronic solutions.

EnrollHub can be used independently or integrated with your current EFT and ERA enrollment tool. This
