CAQH® Solutions

Streamlining administrative processes for the dental industry.

The CAQH Credentialing Suite

Three CAQH Solutions® make up the Credentialing Suite. They provide dental plans with an integrated set of data solutions that encompass key functions of the credentialing process: collecting and sharing dentists' professional and practice data, primary source verification and ongoing sanctions monitoring. Dental plans can reach credentialing decisions sooner, with fewer staff resources.

CAQH ProView®

The American Dental Association® (ADA) and CAQH are collaborating to make it easier for dentists to enter and share their professional and practice data with dental plans for credentialing and other business needs. ADA is widely promoting this service to all U.S. practicing dentists, including its membership of 161,000 dentists.

Dental plans access this information electronically, eliminating the resource-intensive process of accepting data manually and entering it into their own systems. Dentists eliminate duplicative paperwork and plans reduce errors and costs.

VeriFide™

Integrated with CAQH ProView, VeriFide improves the speed, integrity, and quality of the credentialing verification process. The solution returns 98 percent of initial files within 14 days with 98.5 percent accuracy and completeness. CAQH is an NCQA-certified credentials verification organization (CVO)

SanctionsTrack®

SanctionsTrack consolidates and electronically reports provider sanctions by continuously scanning more than 500 state licensing boards and federal sources such as System for Award Management (SAM) and Office of the Inspector General (OIG).

For more details on how CAQH Solutions can streamline administrative processes for your dental plan, contact a member of our Business Development team at Sales@CAQH.org or visit our website, www.caqh.org.

Additional CAQH Provider Data Management Solutions

DirectAssure®

DirectAssure substantially increases the accuracy of provider directories and reduces the need for plans to conduct direct individual outreach to dentists. Integrated into the CAQH ProView workflow for dentists, the Solution complies with state and federal directory requirements.

EnrollHub®

EnrollHub simplifies enrollment for dentists in electronic funds transfer (EFT) and electronic remittance advice (ERA) functions with participating plans, reducing the use of paper checks. Three of the top five national dental plans, representing more than 30% of the dental insurance marketplace, are using EnrollHub to enroll dentists in EFT and ERA.

CAQH, a non-profit alliance, is the leader in creating shared initiatives to streamline the business of healthcare. Through collaboration and innovation, CAQH accelerates the transformation of business processes, delivering value to providers, patients and plans.
