

For Provider Groups

Manage provider data for delegated credentialing, directories and more in one solution.

CAQH ProView for Groups streamlines provider profile management and enables one delegated roster solution for all participating health plans.

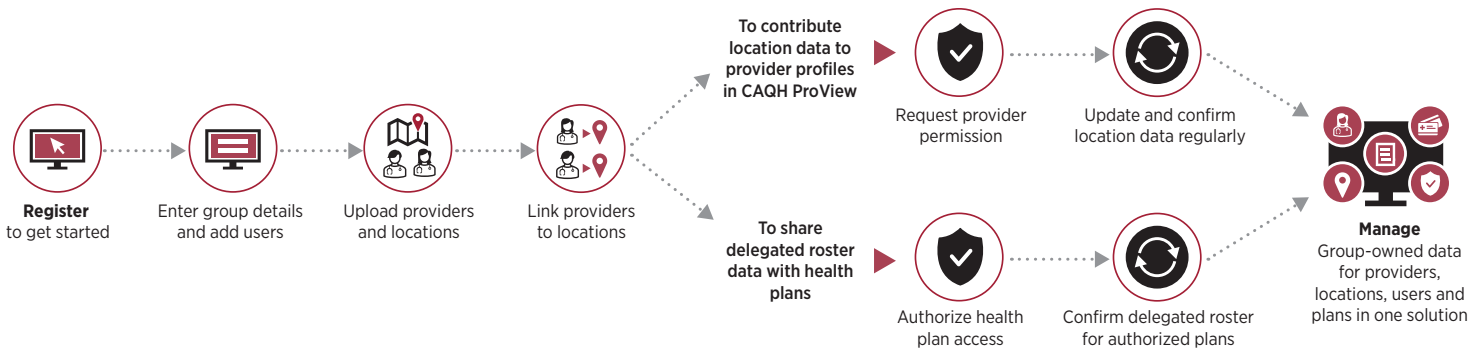

Provider groups can generate delegated rosters, confirm directory data and even push location information to individual provider profiles. Available to provider groups and practice managers at no charge.

BENEFITS

- Centrally manage group and location data for delegated rosters and individual ProView provider profiles.
- Add information using a batch file upload or directly within the portal.
- Ensure your data is complete and accurate with automated data validation.
- Generate one delegated roster for all participating plans.
- Contribute practice location information to individual CAQH ProView provider profiles automatically.
- See status and details for all providers, locations, team members and plans associated with your group.

HOW IT WORKS
